ABOUT ME

Dedicated and skilled React.js and React Native Developer with 1.8 years of hands-on experience in designing and implementing efficient user interfaces. Proficient in build dynamic and responsive applications for web and mobile platforms. Adept at collaborating with cross-functional teams to deliver high-quality software solutions.

EXPERIENCE

Software Engineer

Abstract LLP

April 2023 - Oct 2023

Raipur, Chhattisgarh, India

Cookr : Celebrate Home Food (React Native) [↗](#)

» Worked in high-traffic mobile application with over 1 million downloads on the Google Play Store and deliver a seamless cross-platform experience for users on both Android and iOS devices

» Integrated Redux Saga middleware to manage asynchronous operations efficiently. Orchestrated API integration within sagas for data retrieval and updates.

» Redesigned the Kitchen Page, Kitchen Card and Cart Page, focusing on layout modifications and style enhancements as per design requirements. Refined elements for improved presentation and readability.

Cookr: Home Chef (React Native) [↗](#)

» Developed and integrated a robust broadcast messaging system within the Cookr app, facilitating seamless communication and updates for users.

» Implemented functionalities that enabled users to easily connect with support services via calls or emails directly from the application interface, ensuring prompt assistance and streamlined user interactions.

» Collaborated in google analytics and netcore functionalities, enabling comprehensive monitoring of user interactions, behavior, and app performance

Jr. Software Engineer

Extended Web AppTech

Sep 2022 - March 2023

Hyderabad, Telangana, India

TrustEasy (React Native)

» ATO EFT Reconciliation Report (implemented FlatList and API call, created reconcile reports all clients reconcile transaction reports are displayed on each clients transaction row)

»Fee Fund Refund Process Screen (implemented axios for API calls created tax return lodge, under review and completed transaction)

SKILLS

Github : <https://github.com/iamhrhp>

Programming Languages : JavaScript

Technologies : React.js React Native

NextJS Redux TypeScript Hooks

HTML CSS GitHub Firebase

REST APIs Tailwind CSS Saga/Thunk

Postman BitBucket Material UI

FlexBox Jest/Enzyme

EDUCATION

Govt. Digvijay College, Rajnandgaon

M.Sc. in Computer Science

Aug 2019 - Oct 2021

Rajnandgaon, Chhattisgarh, India

7.6 CGPA

Govt. Digvijay College, Rajnandgaon

Bachelor of Computer Application (BCA)

Aug 2015 - May 2019

Rajnandgaon, Chhattisgarh, India

6.3 CGPA

Sarveswar Das High School

Class XIIth

June 2014 - May 2015

Rajnandgaon, Chhattisgarh, India

6.1 CGPA

ACHIEVEMENTS

- PMPL (PUBG) Mobile semi finalist (08/2019)
- Got Game Tester offer from RockStar.

INTERESTS

- Gaming / Streaming.
- Anime / Manga.
- Playing Competitive Games.
- Technology Gadgets.

- » Transaction List Screen (implemented validation using formik in transaction list and different screen for valid post API call)
- » Search Clients (implemented API get method call for searching clients in TextInput on onSubmit)
- » Workers Details Screen (worked in Client Screen it has workers details component each of the workers has Actions button modal, edit and delete functionality)

BuildTrust (Reactjs)

- » Transaction List (Created client transaction details Table component using react-data-table-component)
- » Reconciliation Page (created Reconciliation page in list form and table form user can interact with data in both List and table form, it has dropdown list of banks and workers details and amount and tax, tax can be generated automatically according to amount)
- » User Receipt (handle download and upload invoice and receipt in review page and reconciliation page, user can upload invoice in transaction list else download invoice won't visible)

Fipola App (React Native)

- » Deep Linking (integrated deep linking, enhances the user experience by directly taking users to relevant content, user can share link and it navigate user to app directly from outside sources like other apps)
- » Push Notifications (implement firebase push notification API into the app, and configured its dependencies, passes the FCM token.)

Food Delivery App

- » Food Products Screen (Implemented get API call, Displayed API response using Flatlist, onpress each item route to single food page where food price, quantity, add food in cart button added)
- » Order Summary Screen (created add address component for order summary to add new address for user, after adding address it will display all address in order summary screen we can choose any address and continue to checkout screen)
- » Unit testing different components using Jest, achieving 80 percent code coverage and ensuring consistent application functionality.

Frontend Developer

PIS Technologies

📅 Feb 2022 – Aug 2022

📍 New Delhi, India

FilmZilla Streaming Platform

- » Architected the frontend using React.js and Redux, implementing efficient state management for seamless data flow across components.
- » Collaborated closely with the backend team to integrate the Node.js server with the frontend, enabling secure user authentication, video metadata management, and video streaming endpoints.
- » Implemented responsive design principles to ensure a consistent and visually appealing experience across a wide range of devices, from desktop to mobile.
- » Documented key project features, architectural decisions, and implementation details, contributing to the project's knowledge base and onboarding processes for new team members.
